

Pneumatic turning and clamping device PSDV I

Unique assistance and saving of time with only one movement.

The mobile PSDV I is for fast emptying of powder extinguishers from 1 to 12 kg of all types.

The PSDV I can be connected to all FRITZ EMDE powder filling machines.

Turning of the extinguisher enables suction of the extinguisher within a few seconds.

Due to the PSDV I electric turning and clamping device manual suction of the extinguisher is not necessary. Therefore, the operator can do further working procedures in between and gains time.

- » Absolute dust free emptying
- » Clamping device made of galvanized steel

M-SDV Manual turning and clamping device (No. 101 200)

Manual tiltable quick-action clamping device which can be used in connection with all FRITZ EMDE powder filling machines.

The clamping device can be tilted 360° continuously during working procedure.

TECHNICAL DATA

Motor:	AC 230 V, 10 A, 0.55 kW, 25 rpm
Dimensions (l x w x h):	approx. 800 x 400 x 1100 mm
Construction:	aluminium
Weight:	approx. 65 kg
