

## Mobile Powder Filling Units

### No. 113 000 · PFF-SUMATIC V40

**World first – most low-noise powder filling on the market**

**PFF-SUMATIC V40 is the most low-noise machine (64 dB(A)) for emptying and filling of 1 – 12 kg extinguishers of all makes. The machine is a high filling capacity and it takes only 10 seconds to suck and refill an extinguisher.**

In connection with the M-SDV (No. 101 200), manual clamping and turning device suction of the extinguisher is not necessary. Suction within seconds is enabled by turning the extinguisher. Unique assistance and saving of time with only one movement. (Also available with the pneumatic clamping and turning device (No. 101 300))

- » Interstorage of max. 30 kg powder inside the machine hopper
- » Appropriate for all types of powder (ABC, BC, etc)
- » Manual height adjustment
- » Easy and convenient handling
- » Maintenance free polythene filter package
- » Construction in movable compact version
- » Emptying of extinguisher hoses from 0.6 m up to 10 m
- » High quality, very low-noise vacuum pump
