

High- & Low-Pressure Units

No. 461 000 · HD-BERST

The High-Pressure testing unit model HD-BERST is for testing of all High- and Low-Pressure container with additional option to burst up to max. 1000 bar.

Max. admitted dimensions of the pressure container:

- » Capacity: max. 18 l
- » Height: 600 mm
- » Diameter: 280 mm

The unit is equipped with:

- » Pneumatically driven High-Pressure pump
- » Control panel with data recorder
- » Test-/ burst tank
- » Electrically operated chain pulley (bearing load max. 200 kg)
- » Adjustable pump speed
- » 1 piece High-Pressure burst adaptor
- » High-Pressure hose 3 m

TECHNICAL DATA

Dimensions (l x w x h)	approx. 500 x 900 x 1000 mm (control panel) approx. 500 x 500 x 3000 mm (test tank)
Weight (empty)	approx. 200 kg
Water connection	1/2" with 3-5 bar water pressure
Compressed-air	10 bar
Motor	230 V, 10 A, 50 Hz
Colour	hammer finish painted blue
