

High- & Low-Pressure Units

No. 477 000 · HD-350-M

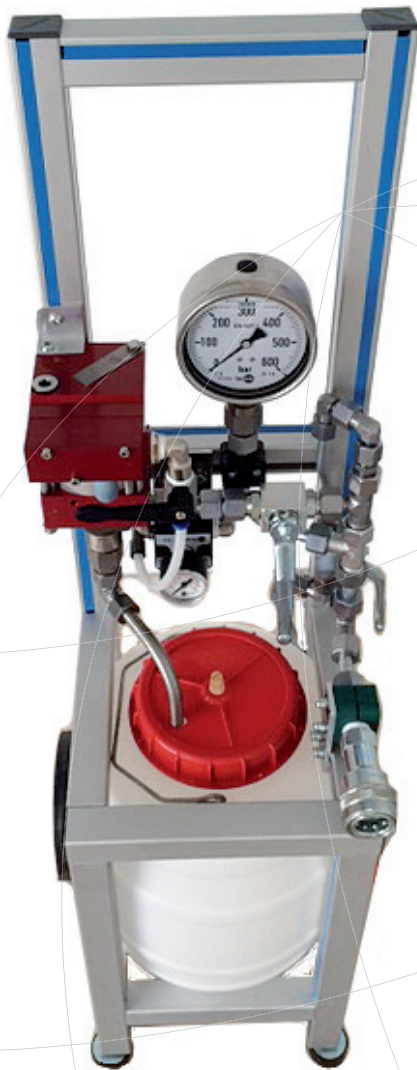

The mobile pressure testing unit HD-350-M is used for pressure testing of fire extinguishing installations, piping and pressure vessels of all kinds.

The unit is equipped with:

- » Compressed air driven pump
- » Pressure reducer for regulating the inlet pressure
- » Safety valve 400 bar
- » Check valve
- » Drain cock
- » transparent water tank
- » Pressure gauge 0 – 400 bar
- » Test hose 2 m

Requires:

- » Compressed air 4 bar at 300 l / min
- » Water

TECHNICAL DATA

Dimensions (l x w x h)	approx. 3 kg
Test pressure	max. 350 bar
Tank capacity	approx. 15 l
Weight (empty)	approx. 18 kg
