

The mobile HSP-F-HD hand hose test pump is a combined compressed air driven system.

The HSP-F-HD can be operated both manually and with the compressed air pump. Check pressure hoses, wall hydrants and risers easily and efficiently.

The HSP-F-HD is equipped with:

- » A 50 liter water collecting container
- » Entry/ exit C-52 Storz manometer
- » HP hose with D-Storz coupling, 2 m long
- » N₂ bottle (3 liters) approx. 150 bar
- » N₂ pressure reducer 0 – 200 bar
- » N₂ pressure reducer 0 – 30 bar
- » N₂ compressed air line
- » Safety valve 0 – 20 bar
- » Pressure pipe (water)
- » Operating pressure max. 16bar
