SERVICE STARTER PACKAGE

FRITZ EMDE – SERVICE STARTER PACKAGE

Starting the business with SERVICE STARTER PACKAGE from FRITZ EMDE.

The proper maintenance and testing of fire extinguishers with the right FRITZ EMDE Powder filling units allows you to:

- » Absolutely dust-free emptying and filling in a continuous process
- » **Cleaning of filter package and hopper achieved automatically**
- » Big advantage is the diagonally positioned removable sieve, which retains lumps and contamination
- » **Best of all, high-quality and maintenance-free self-cleaning filter element**

Mobile Powder Filling Unit

PFF-FLIPP-AIR-MATIC

(No. 101 100) with storage tank, capacity 50 kg and filling adaptor P50-250N for emptying, filling and sieving procedures of fire extinguishers of all makes and sizes.

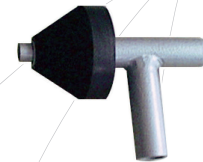

Vehicle support (No. 100 120)

An efficient and handy working process are guaranteed with the different optional features in the service vehicle.

The pull-out about 90° tilting vehicle support is suitable for:

- » PFF-FLIPP-AIR-MATIC
